LATERAL PELVIC/ THIGH SUPPORT

PC's pelvic/thigh supports are universal and can accommodate all users with varying muscle tone and positioning needs.

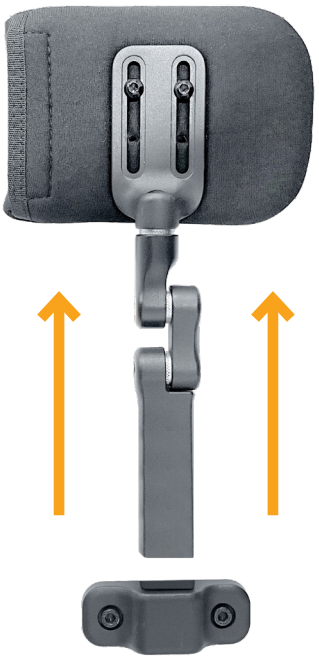
Its adjustable hardware and multiple pad options can be configured for leg adduction and/or pelvic rotation.

This versatile solution is engineered for optimal lower extremity alignment, promoting pelvic stability for effective postural control.

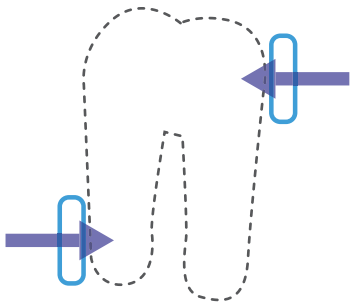
Two available options:
Flip-down or Removable

Flip-down

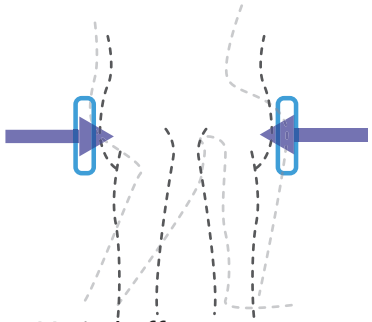
Removable



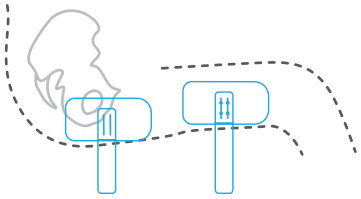
Key Features / Clinical Justification



Correct or prevent hip abduction/external rotation and secure pelvic stability



Varied offset range to accommodate windswept position



Support lower extremity alignment to promote better pressure distribution

HCPCS **E1034** - for lateral hardware **E0956** - for positioning pads

Specification

- 300 lb. weight capacity
- ISO16840-3 2022 compliant
- 1.25" extension length
- ~1.25" offset

Available Pad Sizes

3"x5"

4"x6"

4"x8"

4"x12"
