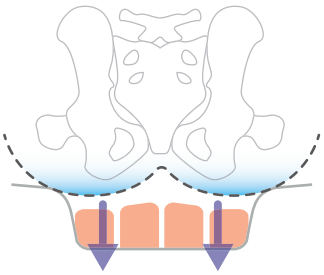
AIR+

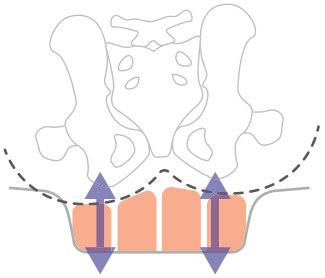
PRECISION COMFORT

For high-risk clients, the PC Air+ Cushion features a manually adjustable air bladder for customizable immersion and offloading. Its deep-well design with ergonomic contours prevent sacral sitting and enhances stability. The universal gel overlay prevents bottoming out, and the contoured foam base ensures conforming support and gentle medial abduction.

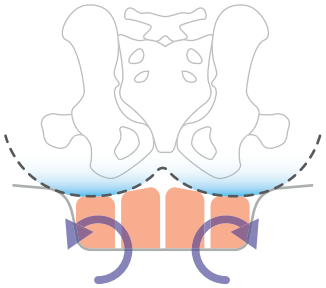
Key Features / Clinical Justification



Remove air under the ITs for optional offloading.



Adjustable to meet changing physical need of progressive diseases



Prevent pressure injury on coccyx and sacrum
