SEAT ELEVATION – Merits Has You Covered!

Providers and clinicians are always looking for ways to improve safety, independence, and long-term outcomes for their patients, especially those who rely on power mobility devices for daily function. One of the most meaningful (and now Medicare-covered) features in this space? **Seat elevation.**

Previously considered an out-of-pocket luxury, seat elevation is now recognized by Medicare as a medically necessary benefit for many power wheelchair users. If you're not yet leveraging this for your patients or offering Group 2 and Group 3 chairs that include it, now is the time.

Merits Health Products offers you the following Group 2 & Group 3 models with seat elevation

Group 2

Vision Sport with Lift
6.5"

Vision Super with Lift
10"

Dualer
5"
elevating seat standard
